+ • ○ I do my best when...

- My supervisor asks me to do things one thing at a time instead of telling me several things at once
 - I can interact with other people and customers at work
 - My coworkers assume I can do things independently and wait for me to ask for help if needed
 - My supervisor gives me positive feedback when I am doing well
 - If I make a mistake, my supervisor is kind and patient when they show me how to do it correctly
 - Someone shows me how to do something before I have to do it myself
 - If a person doesn't understand me, they ask me to repeat myself with different words or to be *slow, clear, and short*
-
